This has been my go-to play for 3rd and long and any other time when I needed to gain some deep yardage. This play tests your ball placement skills with all four routes as TAP, PRESS, and HOLD are all needed to make this play work against any coverage. Even though the play can be flipped, take caution in that the Comeback route doesn't work as well on the right side as you have to wait until the WR fully comes back to you before throwing to him, and by then you will be feeling pressure so the timing is crucial.
